Keuka College.

This Book of Views is designed to supplement the College Catalogue, illustrating certain features of the buildings and activities of the College. It cannot be expected to convey adequately the beauty of the College and its surroundings. In every season this lake region of Central New York has its peculiar charm, and Keuka College occupies the most favorable location of the entire region.

The Catalogue contains careful statements of the courses of instruction, definitions of requirements for admission, estimates of necessary expenses, and much general information of interest to prospective students.

Copies of the Catalogue and of the Book of Views will be mailed without charge to anyone desiring them, upon request to the Secretary of the College.
